

PROJECT TITLE: Fiscal Year 2021-A Pavement Maintenance (Slurry Seal) Project

PROJECT OVERVIEW:

The Fiscal Year 2021A Pavement Maintenance Project will address high priority pavement maintenance needs throughout the City. The Project primarily consists of crack sealing and slurry sealing. It will also include street striping and bike lane striping.

PROJECT BENEFITS: Slurry seals extend the life of existing roadways by protecting the subsurface from the effects of aging and environmental impacts such as water intrusion. Additionally, slurry sealing gives asphalt surfaces a bright black appearance, improving the roadway aesthetics.

In order to efficiently implement the City's Annual Pavement Maintenance Program, the work for Fiscal Year 2021 has been divided into three separate projects. The first project is FY21C Concrete Improvements, which consists of concrete sidewalk repair work and Americans with Disabilities DA access ramps improvements. This project started in spring 2021 and will be completed by late-summer 2021. The second project, FY21A Slurry Seal, will begin construction in summer 2021 and be completed in the fall of 2021. The final project, FY21B Pavement Grind and Overlay, is anticipated to be completed by spring 2022.

QUICK FACTS

Locations: see page two for planned locations

Construction Schedule: Fiscal Year 2021A: summer – fall 2021

Total Project Costs: Approximately \$1.6M

Funding Source: The project is primarily funded by Measure C
