**Project Description:**
The Lower West Downtown Lighting Project (Project) is a multi-phase project to increase street and pedestrian level lighting in the neighborhood. The Project area is bounded by the 101 freeway, Ortega Street to the north, and Chapala Street to the east (See Attachment). The Project area also included new street lighting as part of the Ortega Pedestrian Improvement and Brinkerhoff Street Lighting Projects. The first phase of this Project was completed in 2012. The second phase includes the 100, 200, 300, and 400 blocks of West Cota Street, the 500 and 600 blocks of Castillo, Bath and De La Vina Streets; Dibblee Avenue, and Bradbury Avenue (See Attachment). The work consists of installing 77 street lights as well as installing underground conduits, electrical circuits, and related components. The light fixtures are City Standard fluted concrete poles with Malaga Green dome light fixtures. Additive alternate items include relocating streets signs within the project area and underground conduit runs for traffic signals.

**Project Location(s):** Lower West Downtown Area

**Funding Source(s):** Redevelopment Agency and Street Funds.
